

JOSEPH MADDEN

Principal Full-Stack Engineer · Web Architect

St. Louis, MO · joe@barmadden.com · barmadden.com · github.com/obj63mc · linkedin.com/in/joseph-madden-152b2745

INTRODUCTION

I've been building for the web since the days of classic ASP and using table-based layouts, and continue to keep learning new technologies and frameworks daily. For the last fifteen years I've run the Interactive Department at Moosylvania, a St. Louis agency: building websites with open source technologies, and running the hosting behind about 45 client sites and applications. I ship five or six sites a year and have lead teams from one developer to ten. Thank you for your time in reading my resume and look forward to the opportunity to work with you in the future.

SKILLS

FRONT END

TypeScript, JavaScript, Vue and Nuxt, Modern HTML, CSS and SCSS. Experience with Svelte and SvelteKit, React and Next.js, Astro. Strong on accessibility standards, web performance optimization.

BACK END

Node.js, PHP. Experience with Python for scripting; earlier, ASP.NET and C#, Ruby on Rails, Java and JSP, classic ASP. Experienced in building Full Stack applications, RESTful APIs, web services and integrations.

DATA

MySQL, PostgreSQL, Redis, MongoDB, Elasticsearch

HOSTING

AWS, Cloudflare, Heroku, Render, Docker

CMS AND COMMERCE

Silverstripe, Shopify, WordPress, Strapi, Django, Storyblok, Prismic

MARKETING SYSTEMS

Braze, HubSpot, Salesforce Marketing Cloud, Mailchimp, Campaign Monitor, Klaviyo

LEADING

Estimates, architecture, development and code review for a team of up to ten; working day to day with writers, designers and clients; AI-assisted development with coding agents driven by specs, decision records and tests. Still writing code every day.

EXPERIENCE

CHIEF ARCHITECT

Aug 2013 – Present

Moosylvania · Maplewood, MO

- Own the architecture, stack and hosting for all of the agency's web work, and personally run the hosting for about 45 websites and applications for Gallo Spirits and Scandinavian Tobacco Group across AWS, Cloudflare, Heroku and Render.
- Built and manage every website for Scandinavian Tobacco Group's North American cigar unit (General Cigar Company): Cohiba, Macanudo, Partagas, Punch, La Gloria Cubana and others. Cigar World, a social network for cigar smokers.
- Ship five to six new websites a year from estimate to launch and the hosting. Some of my favorite projects include Bud Light's "Big Game" site during COVID, Sapporo, Soonhari's US relaunch, Anchor Brewing's rebrand.
- Lead a development team that has ranged from one to ten developers, alongside the agency's writers and creatives: architecture, development, code review, estimates and the hard problems.
- Build lifecycle marketing end to end, built about 50 emails a year: Venmo's Braze CRM (email, in-app messages and banners), PayPal's email, banner ads and micro sites, and campaigns in HubSpot, Salesforce Marketing Cloud, Mailchimp and Campaign Monitor.
- Ran usability and prototype testing before two big launches: PayPal Credit's buy-now-pay-later approval flow, and Panera's online ordering properties and in-store kiosks.
- Keep clients' costs down and their options open with open source: Silverstripe as the app platform, Shopify for commerce, headless CMS platforms like Storyblok, Prismic and Strapi. WordPress and Django where they fit.

SENIOR WEB DEVELOPER

Aug 2011 – Aug 2013

Moosylvania • Maplewood, MO

- Built the launch sites for various clients including Bacardi, Grey Goose, and Enterprise Car Share.
- Built promotions and games for Universal Pictures Home Entertainment's home-video releases: Fast Five, Snow White and the Huntsman, The Lorax and other films.
- Brand and campaign sites front to back on PHP and Silverstripe, with the HTML, CSS and JavaScript in front of them.

ENGINEER III

May 2004 – Aug 2011

Network Solutions (MonsterCommerce until the 2005 acquisition) • Belleville, IL

- Started on MonsterCommerce's help desk while finishing my degree.
- Moved to QA with the Product team, testing and shaping the platform's special features project across versions 3 to 5, learning web development on classic ASP and ASP.net. Mid 2005, I transitioned to full-time development on the platform.
- After the acquisition, around 2007 I moved to working directly on NetworkSolutions.com, a JSP e-commerce site: front-end development, A/B testing and checkout optimizations for the registrar's purchase flow.
- Completed development of the company's support portal, improving the user experience and streamlining the support process with full documentation of their platforms.

SIDE PROJECTS

BARMADDEN.COM

2026

- An explorable, multiplayer illustrated St. Louis: visitors are cursors who see each other and walk into the places I've worked.
- SvelteKit and Svelte 5 in strict TypeScript; a hand-written Canvas 2D engine with a prerendered, accessible DOM under every prop; live rooms over WebSockets on Cloudflare Workers Durable Objects; a hash-mode Content Security Policy and consent-gated analytics.
- Two of my old agency games rebuilt inside it (Sushi Stand, Big Muddy), and the art made with image models through an upscaling and review pipeline.

OPEN SOURCE CONTRIBUTIONS TO THE SILVERSTRIPE CMS PLATFORM

2019-present

- Contributed to the Silverstripe CMS platform by submitting pull requests, reporting bugs.
- Currently manage the Silverstripe AWS S3 module for handling assets and file uploads.

EDUCATION

BS IN COMPUTER SCIENCE, WITH HONORS

2001 – 2005

Saint Louis University • St. Louis, MO

- Senior project: a static analyzer that built control-flow graphs of C and Java source and computed cyclomatic complexity for basis path testing.

OFF THE CLOCK

Former South Side Cyclery racer: 160 miles across Indiana in a day, 235 across Wisconsin in two, and across Missouri three times. Craft Beer lover and an avid Cleveland Browns Fan.
